What are the Risks?

Potential investors should be aware that an investment in the Protected Cell involves a high degree of risk and is suitable only for investors who fully understand and who can bear the risks of such an investment for an indefinite period. Listed below are the 'Certain Risk Factors' relating to an investment in the Protected Cell: **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Shariah compliance risk:** the risk that the restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs. funds that do not have this restriction. Returns to shareholders may also be reduced due to payments to Shariah approved charities to "purify" dividends. All potential investors must carefully read the sections entitled "Certain Risk Factors and Potential Conflicts of Interest" in the Prospectus and Supplement for a full discussion of all the risks before making an investment in the Protected Cell.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus.

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment.

Subscriptions to shares of the Fund can only be made on the basis of the current prospectus of the Fund, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. An investment in the Fund entails risks which are described in the Fund's prospectus.

The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. **Past performance does not predict future returns.** Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations.

In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks that may increase the risk profile of the fund and are more fully described in the Fund's prospectus. If the fund invests in a specific sector or geographical area, the returns may be more volatile than a more diversified fund.

The investment activities will be undertaken in accordance with the relevant Shariah investment guidelines and Shariah operational guidelines as approved by the Shariah Supervisory Board and attached to the relevant Supplement. As a consequence, the performance of a Fund may possibly be lower than other investment funds that do not seek to strictly adhere to the Islamic investment criteria. The requirement to "purify" cash holdings or dividend income will likely result in payments being made to charities. The return to investors will be reduced by the amount of such payments. Shariah reviews of each Protected Cell will be undertaken by the Shariah Supervisory Board in accordance with AAOIFI GSIFI No 2.

No shares of the Fund may be directly or indirectly offered or sold to residents of the United States of America. Shares of the Fund are not available for distribution in all jurisdictions and prospective investors should confirm availability with their local Franklin Templeton Investments representative before making any plans to invest.
