Historical performance is not and should not be construed as being indicative for the future or likely performance.

Portfolio Manager Commentary

See report from Apex Capital.

Distribution policy and capital depletion

The share class aims to make regular distributions at a pre-announced rate reviewed on a quarterly basis by the Directors of the Fund. Distribution rates are set on the basis of the average anticipated total return of the share class, are funded by available cash and can exceed the income of the underlying investment. In the event that the rate of distributions falls short of the total return achieved during a given period, the share price will decline by an amount corresponding to the shortfall leading to capital depletion.
